

George Romney Junior School: Strategic Priorities 2021-2022

- ✓ To actively explore all possibilities to enable all children, regardless of their previous learning experiences (due to the pandemic and other potential barriers) to fully engage in all aspects of learning and school life. This will include, but not be limited to, making good progress in their learning and achieving key life-skills goals.
- ✓ To celebrate our curriculum and enhance it with extended learning opportunities into the wider world via embedded global learning goals as well as fully involving all children in self-assessment of the skills and knowledge they have acquired systematically through well-structured, sequenced topics of learning.
- ✓ To maintain a focus on a healthy, active lifestyle with a balanced approach to learning and life for all children and all staff members. To embed the connections between good mental health, well-being and successful learning.

We want our children to know:

- ✓ We will do everything we can to make the learning in school fun, exciting and relevant to what they need to know right now in their lives!
- ✓ We will keep exploring the world around us, we will keep asking questions and make sure we understand our place in it!
- ✓ We are going to keep on looking after ourselves and being healthy in our minds and our bodies because this is what helps us to learn the best!
