

George Romney Junior School: Strategic Priorities 2018-2019:

- ✓ To strive to meet the needs of SEND, PPF and vulnerable children in every year group through high expectations for all learners and further development of excellent teaching strategies focused on meta-cognition and enriched language opportunities
- ✓ To improve confidence and competence in learning and researching correct spelling patterns. This will be linked to enriched language and further development of self-assessment/correction strategies
- ✓ To further refine our curriculum with extended learning opportunities into the wider world via embedded global learning goals as well as involving children in self-assessment of the skills and knowledge they have acquired through topics
- ✓ To maintain a focus on a healthy, active lifestyle with a balanced approach to learning and life

At George Romney Junior School, we want the children to know:

- We want all children to make excellent progress in school and understand how they are learning and getting better
- We want our children to feel really confident with tricky skills like learning spellings and working out ways of helping themselves as well as learning from the teachers
- We want our classrooms to be exciting places that help us learn more about the amazing world we live in
- We are going to keep looking after our bodies and our minds by keeping fit, eating a balanced diet and talking about how we feel to our friends, families and trusted adults
