

George Romney Junior School: Strategic Priorities 2022-2025:

- ✓ *A continued focus on supporting and developing good mental health and well-being and the obvious links to good physical health and activity. To actively explore all possibilities to enable all children (regardless of their potential barriers) to fully engage in all aspects of learning and school life.*
- ✓ *To thoroughly embed strategies we know will have a positive impact on improving language skills. Looking at oracy, reading and writing as a linked and interwoven process with strong knowledge of specific vocabulary and it's correct usage giving advocacy to all children.*
- ✓ *To review and refine our curriculum and enhance it with deeper learning opportunities as well as fully involving all children in their self-assessment/reflection of the skills and knowledge they have acquired systematically through well-structured, sequenced topics of learning.*

At George Romney Junior School, we want the children to know:

- We are **all** going to keep looking after our bodies and our minds by keeping fit, eating a balanced diet and talking about how we feel to our friends, families and trusted adults. Some of us might need more help with this and that is fine!
- We want to keep on learning how to be confident, how to talk about our learning using the correct words, how to read and find out more about our learning and use our writing skills to record our learning in different ways
- We want all children to want to make good progress in their learning. We want our children to understand how they are making progress in all areas of the curriculum and how the things they learn, link together and follow on
